### MATEMATIKA

#### 1. ura

Zdaj pa že obvladaš številске izraze, je tako? ☺

V petek si imel/a domačo nalogo v zbirki znam za več. Spodaj preveri kako ti je šlo. Zapisani so samo rezultati, ti pa nikar ne pozabi, da moraš vedno narediti tudi vmesni korak.

##### 1. Izračunaj.

#### Izrazi s spremenljivko

##### 1. Izračunaj vrednost izrazov za $x = 5$ .

|                              |
|------------------------------|
| $42 + x = 47$                |
| $35 : x = 7$                 |
| $7 \cdot (x + 4) = 63$       |
| $(53 - 8) : x = 9$           |
| $(2 + x) \cdot (x - 2) = 21$ |
| $(100 + x) : x = 21$         |

Račun takoj še enkrat prepisi tako, da namesto neznanke  $x$  vstaviš število 5.

Kljub vsemu, da znaš predlagam, da še malo utrdiva znanje. Najprej reši naloge, rešitve se nahajajo na naslednji strani. Učni list lahko natisneš, če pa tiskalnika nimaš račune prepisi v zvezek in izračunaj. Ne pozabi na vmesni korak.
